

John Darling Mall

January 2019 - Poole

Description:

Vargo pipes supplied ECOPEX® a flexible pre insulated PEX-a pipe system for John Darling Mall. The former John Darling Mall respite centre in Selborne Drive has completely removed to make way for 18 one-bedroom flats, two communal areas and parking spaces. The new facilities would provide accommodation for Hampshire residents who require up to 24-hour care. Vargo Pipes are connecting a remote boiler house to the main new building. The whole project will be completed in the Spring 2019.

System installed:

ECOPEX® fully bonded system
63mm UNO Pre-insulated PEX
Press fittings and heat shrink shrouds
