

West Green Place November 2018- Centre of London

Description:

Vargo pipes supplied ECOPEX® a flexible pre insulated PEX-a pipe system for Green Place, London. A collection of 98 one and two bedroom affordable Pocket homes; 12 two bedroom open market Pocket Edition homes and 16 Pocket Edition open market town houses set around a new landscaped street in leafy Tottenham.

This was the first time the developer had used Vargo Pipes and they were very pleased with the quick delivery and installation support given. The long coils supplied allowed a quicker installation of pipe work and helped to overcome any on site variations with existing services easily avoided. The district heating network installed supplies hot water to different buildings and plant rooms across the site.

System installed:

- ECOPEX® fully bonded system
- 50mm Pre-insulated PEX
- 40mm Pre-insulated PEX
- 32mm Pre-insulated PEX
- Press fittings and heat shrink tees
